

Driftless

Automated API documentation for ASP.NET/.NET teams. Driftless scans source code, extracts real API routes and schemas, and reduces documentation drift before it becomes team rework.

70% willing to try	\$120 LTV	\$3,090 M12 MRR
-----------------------	--------------	--------------------

6 discovery interviews	5/6 strong pain	8/10 pain confirmed	8/10 found useful	1 design partner MOU	2+ feedback sessions
---------------------------	--------------------	------------------------	----------------------	-------------------------	-------------------------

Problem

Small API-heavy teams lose **4-16 hours per developer per week** to stale API docs, unclear request/response types, backend/frontend clarification loops, and manual Postman-style verification.

Solution

Paste a public GitHub repository URL. Driftless analyzes ASP.NET/.NET source code with Roslyn, extracts routes, methods, parameters, request/response schemas, and generates TypeScript definitions.

Target Customer

Initial wedge: ASP.NET/.NET API teams of **2-6 developers**. Strongest fit: teams without strict API governance where frontend, backend, and mobile work in parallel.

Why Now / Why Us

The team is building from lived developer pain, validated through interviews, usability testing, and a working MVP. A focused .NET wedge keeps quality measurable before expansion.

Business Model

Free	\$0/mo	Current MVP
Pro	\$15/mo	Planned individual tier
Team	\$50/mo	Planned small-team tier

Unit Economics Snapshot

ARPU	\$15/month
Lifetime	8 months
LTV	\$120
Primary CAC	\$5 GitHub outreach
LTV:CAC	24:1 on GitHub

GTM Strategy

Primary: GitHub Developer Outreach. **Secondary:** university/community validation and LinkedIn B2B outreach. CAC by channel: GitHub \$5, University \$2.50, LinkedIn \$20.

Market Size Snapshot

TAM	15.0M devs	\$2.7B/yr
SAM	2.865M .NET devs	\$515.7M/yr
SOM	206 paid users	\$37.1k ARR run-rate

Estimates: TAM uses a 10% backend/API-relevant share of GitHub-scale developers; SAM applies Stack Overflow 2024 ASP.NET Core professional-developer usage share of 19.1%; SOM uses the existing 12-month model.

12-Month Expected Projection

Total users	1,290
Paid users	206
MRR	\$3,090
Monthly costs	\$1,895
Monthly profit	\$1,195
