

DRIFTLESS

API contracts that never go stale.

driftless.nikatopu.dev

The Pain Is Real and Validated

"Actual API behavior doesn't match documentation."

"Costs hours or days of rework."

"Blocked until backend writes documentation."

Missing API Contracts

Pain 5/5

Paste a URL. Get Every Contract.

DRIFTLESS extracts every API contract, route, and TypeScript type **directly from the implementation** – no annotations, no configuration, no drift.

Built for ASP.NET Core

Targets professional .NET backend teams

Powered by Roslyn

Microsoft's C# compiler API – compiler-accurate output

LIVE DEMO

driftless.nikatopu.dev

A public ASP.NET Core repository URL submitted. Every endpoint discovered. TypeScript interfaces generated. **Zero configuration required.**

① Input URL

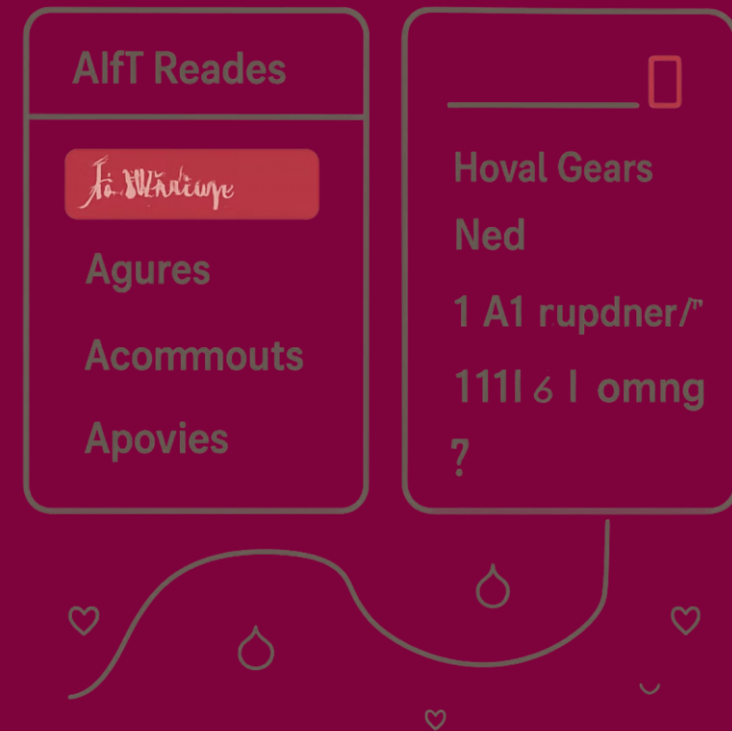

Any public GitHub repo

② Routes Discovered

All endpoints extracted automatically

③ TypeScript Output

Interfaces ready to import

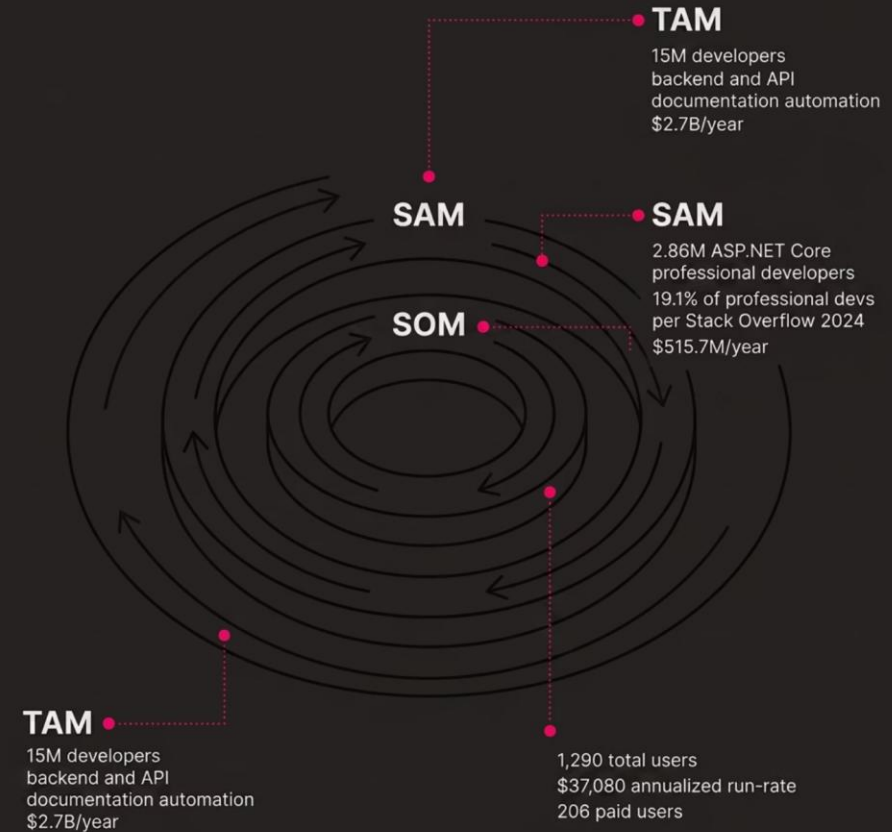

A Credible, Bottom-Up Market

Three concentric circles from the broadest addressable market down to our focused year-one opportunity – each grounded in visible arithmetic.

- **TAM:** 15M developers × \$180/yr = **\$2.7B/yr**
- **SAM:** 2.86M ASP.NET Core devs (19.1% of pros, Stack Overflow 2024) = **\$515.7M/yr**
- **SOM:** 1,290 users | 206 paid = **\$37,080 annualized run-rate**

Business Model & Unit Economics

Free – \$0/mo

Limited scans, basic output

Pro – \$15/mo

Unlimited scans, exports, integrations

Team – \$50/mo

Collaboration, CI/CD integration

Channel	CAC	LTV	LTV:CAC	Payback
GitHub outreach	\$5	\$120	24:1	0.33 mo
University / community	\$2.50	\$120	48:1	0.17 mo
LinkedIn outreach	\$20	\$120	6:1	1.33 mo

 **Month-12 projection:** 206 paid users | \$3,090 MRR | \$1,195 monthly profit – pre-revenue today, monetization planned.

Competition & Moat

Every competitor requires manual setup, annotations, or configuration. Driftless is the only solution that reads the implementation directly – zero friction, compiler-accurate output.

Tool	Auto-discovery	.NET native	Real-time sync	Zero annotation	TypeScript out	Free tier
Swagger/Swashbuckle	X	✓	X	X	X	✓
Postman	X	X	X	X	X	✓
NSwag	X	✓	X	X	✓	X
Stoplight	X	X	X	X	X	X
Readme.com	X	X	X	✓	X	✓
Redocly	X	X	X	✓	X	X
DRIFTLESS	✓	✓	✓	✓	✓	✓

Roadmap to Month 18

✓ Sprint 1 – Complete

Public repo analysis · Roslyn extraction ·
TypeScript generation · Live dashboard
deployed

1

2

3

4

Sprint 3 – Expansion

FastAPI & Express.js support · Multi-
framework dashboard · Team
collaboration features

Sprint 2 – Next

Private repos (GitHub OAuth) · Breaking
change detection · CI/CD integration ·
OpenAPI export

Funded Milestone – Month 18

500 paying users · \$7,500 MRR · 3
institutional pilots

The Team

Nikoloz Topuridze

Tech Lead — Built the Roslyn extraction pipeline and backend API

Toma Danelia

Discovery Lead — 6 interviews, 10 validators, ICP framework

Giorgi Tkebuchava

Program Lead — Growth strategy, financial model, unit economics

Nikoloz Bujiashvili

Design Lead — High-fidelity prototype, 5-participant usability study

We Are Raising **\$25,000**

Use of Funds

Infrastructure & compliance	\$8,000
Multi-framework development	\$12,000
Institutional pilot program	\$5,000

Pre-money valuation: \$100,000 · Dilution: 20%

Funded Milestone Month 18

Pre-revenue. Deployed product. Validated pain. Clear path.

driftless.nikatopu.dev

500 paying users

\$7,500 MRR
